NCSA is committed to providing quality education, offering over **75 programmes** spanning higher education.

We aim to meet the diverse educational needs of students both within Russia and internationally. NCSA has a student body of over **6,000 students** from **14 regions** of Russia and **11 foreign countries** - including an international community of almost **700 students**.

NCSA has a staff of **573 employees**, including **31 Doctors of Science** and **171 PhDs**.

The Academy comprises **7 institutes**, including **Medical Institute**. Graduates can further their studies at the **postgraduate** and **clinical residency** levels.

Our facilities include **13 educational and laboratory buildings**, a library and publishing center, an accreditation and simulation center, a center for student creativity, a center for youth projects and initiatives, **2 dormitories** and **2 guesthouses** located in picturesque areas in Karachay-Cherkessia and along the Black Sea coast.

The FMGE pass rate for NCSA graduates (32.3%) is significantly higher than the average in Russia (25.9%) and exceeds the global average (**23.4%**). (*Source: National Board of Examinations in Medical Sciences. Report on Country-wise and Institute-wise Performance in FMGE*)

This demonstrates **the superior quality of medical training** for General Medicine students at NCSA.

Our **graduates** easily succeed in finding **well-paid jobs**, both in Russia and in their home countries.

NCSA graduates can **continue their studies** at the postgraduate level, including **clinical residency** - all offered right here **at the academy**.

ACADEMIC PROGRAMMES

General Medicine (with English included)

Focus: Clinical disciplines (internal medicine, surgery, pediatrics, etc.) with practical training (*equivalent to MBBS*)

Dentistry

Focus on dental propaedeutics, specializations include therapeutic, orthopedic, and surgical dentistry.

Medical Cybernetics

Interdisciplinary field combining IT, physics, and medicine. Graduates work with medical equipment, research, or clinical roles (e.g., cardiology).

Paediatrics

Focus on child healthcare, with practical training at local hospitals.

Pharmacy

Covers drug development, toxicology, and pharmacy management.
